- Proven experience in managing employees, team player, multitasker, strategic thinker, and tech-savvy.

Educational Practical Experience:

Practical Full Stack Development Projects

2022-2023

- **everAfter Web Application:** designed to streamline the planning and management of weddings for wedding planners, brides, and grooms. This comprehensive solution serves as my final project for HackerU College, reflecting a synthesis of skills in React with TypeScript, NestJS, MUI, and responsive design. Features include user login/registration and the ability to manage multiple events for businesses or a single event for private users. **Technologies Used:** React with TypeScript, NestJS, MUI.
- **Client Management System development project:** Developing a fully web-responsive client management system with a unique responsive design (UI/UX) that displays the client's details, updates, and changes. **Technologies used:** Angular and Firebase
- **Business Card, Client interface management system project:** The system enables complete client management control and is slated to have a user interface. **Technologies used:** Node.JS, React.JS.
